In the third quarter of 2026, profit after tax attributable to owners of the parent of Dong Son Holdings Joint Stock Company reached VND 36.807.091.295, an increase of VND 24.110.356.446, or 189,89%, compared with the same period of 2025. The main reasons are as follows:

- In the third quarter of 2025, Ha Noi - Bac Giang BOT Investment Joint Stock Company ("BOT") was an associate, and DSH recognized its share of BOT's profit using the equity method. In the third quarter of 2026, BOT was a subsidiary, and its business results were consolidated into DSH's financial statements, with profit after tax allocated to owners of the parent and non-controlling interests in accordance with applicable regulations. The increase in DSH's ownership interest in BOT increased the share of BOT's profit attributable to owners of the parent compared with the same period of the previous year.
- In addition, the parent company's construction operations improved as the acceptance of completed work at projects was accelerated, increasing net revenue by 72,20% and gross profit by VND 7.025.135.137 year on year. The parent company's financial income also rose due to higher interest income from bank deposits. These factors contributed to profit growth, although general and administrative expenses increased mainly due to higher salary expenses following an increase in headcount.

As a result of the above factors, profit after tax attributable to owners of the parent in the third quarter of 2026 increased by 189,89% compared with the third quarter of 2025.
